

AWARD for the best paper on “Fracture mechanics of weldments” in memory to Prof. Dr Stojan Sedmak

Turkish welding community is offering the AWARD for the best paper on “Fracture Mechanics of Weldments” to remember the great scholar and academician Stojan Sedmak, the founder of fracture mechanics in Serbia and the region. It was back in 1968 when he published and defended his magister thesis, including a chapter on Fracture Mechanics, for the first time in ex-Yugoslavia. Later on, he made significant contributions to Fracture Mechanics of Weldments, on the larger, world wide scale. It is his support to the Turkish welding community, during IWE courses, that we would like to remember. Therefore, we offer 750 euros for the best paper dealing with welded joints and cracking. The committee to decide on the best paper will be formed soon by the ESIS ExCo, and all other details will be announced in due time.

Dr. Galip Buyukyuldirim, on the behalf of Turkish welding community, and Prof. Dr. Aleksandar Sedmak, on the behalf of ECF22 Organizing Committee.
